

The NSF expresses our deep gratitude to the Long-Term Ecological Research (LTER) 40 Year Review Committee- Drs. Church, Cloern, Evans-White, Grebmeier, Hernández, Laney, and North. We also sincerely thank the many members of the LTER community, and the LTER Network Office, for their inputs via the self-study analysis, interviews, and timely responses to questions and surveys.

The Report (https://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf22200) is evidence of the thorough and thoughtful analysis and synthesis you undertook for an extended period. Your considered recommendations will be carefully evaluated by the NSF LTER Team. We expect to provide periodic updates to the Directorate for Biological Sciences Advisory Committee (BIO AC).
